

# The ecoline Advantage

Certified by Siemens to Perform Like New

**1,000+** ecoline  
systems sold  
worldwide  
since 2001

Pre-owned imaging equipment must perform like new.

That's why our ecoline refurbished systems are rebuilt following a strict ISO-certified process and tested with the same specifications as new systems.

When comparing ecoline systems to competitive offerings, question if the vendor goes beyond basic cleaning, disinfecting, and aesthetic repairs.

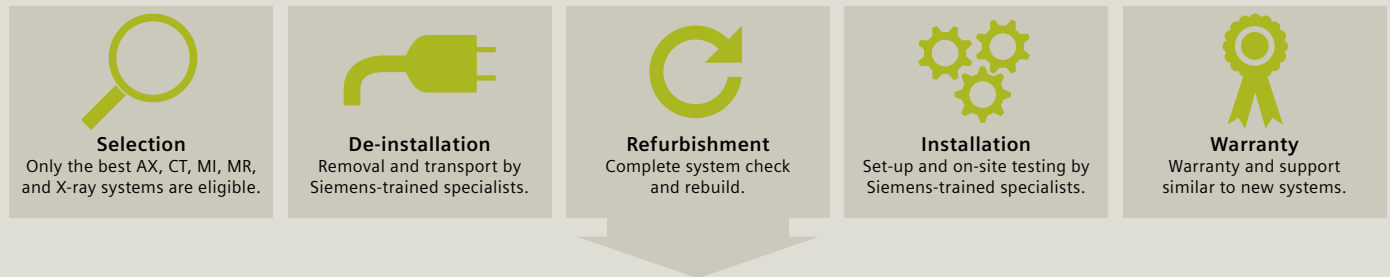

**Siemens does.** We enable you to configure your ecoline system to your exact clinical needs, and we install the latest software version.

ecoline systems deliver the performance you expect at a price you may not.

**ecoline**

Certified performance.  
Exceptional value.

## Five-Step Refurbishment Process | Reengineering systems to deliver like-new quality and reliability

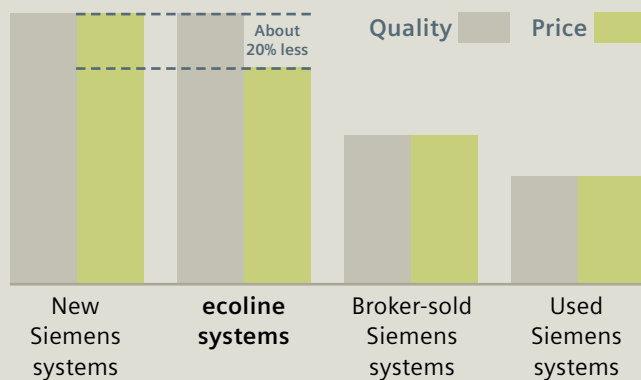

## Key Differentiators | How ecoline refurbishment surpasses that of broker-sold systems

	Clean	Disinfect	Aesthetics	Software	Hardware	
ecoline systems	✓	✓	✓	✓	✓	<ul style="list-style-type: none"> <li>✓ Thorough system cleaning, disinfecting, and aesthetic repairs.</li> <li>✓ Configured to customers' specific needs and budgets.</li> <li>✓ Rebuilt with only certified OEM parts and hardware.</li> <li>✓ Guaranteed parts and service availability for at least five years.</li> <li>✓ Equipped with the latest software releases.</li> <li>✓ Tested using the same protocols as new systems.</li> <li>✓ Refurbishment factories in Germany, India, and the U.S.</li> </ul>
Broker-sold systems	✓	✗	✗			

## Market Comparison

Siemens quality at significantly reduced prices

## Value and performance

# without compromise

Whether your focus is on

- ✓ improving care delivery and safety;
- ✓ expanding clinical capabilities and service lines;
- ✓ or being more competitive in your market,

ecoline systems offer the best of Siemens technology to help you achieve these and other business goals—for a fraction of the total cost of new systems.
